it's not a secret, but she loves fire and explosions

# **Background Story**

Splorch grew up in a clan that were former slaves and currently closely related to the naturally tinkering Rock Gnomes. The Gremlin Clan are different than other goblins because of their relationship with the gnomes. Splorch grew up with an affinity for artifice and creating. Many of her clan's members have been invited to work with the Collegium Imaginata in various capacities, herslef included. She primarily functions as a lab assistant for various scientists and researchers. Occasionally she will also funtion as a guinea pig for some less deadly experiments
